8:30-9:15 am
3-5 yrs.

July 8th-July 29th

NURTURING YOUR CHILD'S POTENTIAL

Would you like your child to participate in age-appropriate activities and beat the winter blues? Check out the programs we are offering this winter! Youth Enrichment Programs are free for Y Members; a fee will apply for non-members.

Little Explorers- Through the duration of this program, children will participate in activities designed to satisfy their curiosity and nurture their love of the great outdoors. We will experience hands-on exploration, participate in interactive games, see the beauty of nature in our crafts, and have time for some fun field excursions around the Y!!

Ice Age- Travel with us back to a fascination time when glaciers covered the Earth. Explore the captivation properties of ice- how does ice move, melt, and interact with other materials? Experiment with all things cold and icy, learn how animals stay warm in fridge temperatures and discover fizzy ice, dry ice painted ice and more!

Storybook Steam- Read, discover and create! We will pair our favorite children's books with an exciting hands-on STEAM activity to get your child engaged in the story and be amazed as the book comes to life!

Maker Gym- Kids will use critical thinking, problem solving, creativity, and curiosity to develop fun obstacles and activities using different equipment each week. Children will work as a team to develop their own exercises and take a look at how STEAM is involved in the sports they all know and love!

Rookie T-Ball- is a preschool-level sports program that introduces kids to sports through an environment focused on exercise, socialization and team work. It consists of loosely structured play to help kids develop motor skills, build confidence and enhance socialization skills.
